

Design versatility *reaches new heights.*

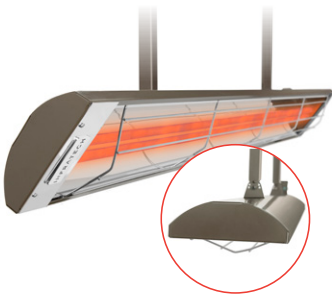

Introducing new Drop Pole installation from Infratech —
the brand that offers the broadest array of mounting
options for outdoor comfort heat

INFRATECH
COMFORT

Ultimate comfort *from every angle.*

With pole, ceiling, wall and our popular flush mount option, Infratech's versatile range of designer-friendly installation options has helped to establish our products as amenities of choice at the most prestigious residential and commercial properties in the world. Now, we are expanding our offerings yet again to include new Drop Pole installation.

Infratech's Drop Pole Mount is ideal for outdoor living spaces with high, vaulted and uneven ceilings.

- The Drop Pole Mount is ideal for spaces with high, vaulted or uneven ceilings, allowing the heaters to be installed and positioned in different directions.
- Drop Pole installation is an effective way to maximize ambient warmth in spaces where heaters are mounted above 12 feet. The pole adjusts from 29" to a maximum extension of 72".
- This mounting option is compatible with Infratech C-Series and CD-Series heaters.
- The Drop Pole Mount has been designed to be installed with the heater conduit concealed within the pole shaft.
- Choose from White, Black and Bronze color options to coordinate your heater with surrounding décor.
- Standard colors also available upon request.
